CMP- Remote Desktop Access for Linux

You will need to install the **Remmina** remote desktop client. (Remmina is already included in Ubuntu)

Once installed make sure you select the RDP drop down option

On the next screen input the following configuration details

Give your p	rofile a name	м	ake sure RDF	P is selected
Cr test		Remote Desktop Preference	8	
Rubbish Bin	Name Group Protocol Pre-command Post-command	CMP Lab PC CMP Lab PC Cmmand %h %u %t %U %p %g -option Cmmand %h %u %t %U %p %g -option Cmth/to/command copt1 arc %h %u %t copt2 %Ll %p %c		
	Basic Adva Server Username Password Domain	Autostart SSH Tunnel cmpsci-101.uea.ac.uk • fmv12mdu • UEA •		Fill in the connection details including UEA username & password. Make sure the Domain is set to
	Resolution Colour depth Share folder	Use initial window size Use client resolution Custom 1280x960 GFX RFX (32 bpp) (None)		
	Cancel	Save as Default Save Connect Save and Connect	ect	Change the size of the window if required

RDP -							\otimes	
Name	Group	Server		Plugin	Last us	ed		
⊗CMP Lab PC		Connect	er.uk	RDP	2020-10	-05 - 17:0	03:34	
		Copy Edit						

Once the connection has gone through you should be logged on and connected to the CMP Lab computer.

Trouble Shooting

- Make sure your UEA details and password are correct.
- Make sure the PC you are connecting to is from the list on the Wiki <u>https://supportwiki.cmp.uea.ac.uk/en/public/rdpstudent</u>
- Make sure you add **uea.ac.uk** to the end of the server name section.
